

BrightPath Tech — RFP Response: Order Management Platform

Executive Summary

Request for Proposal: Supplier response to build and support a cloud-based order management platform for a mid-size retail distributor, including integration with existing ERP and payment systems.

BrightPath Tech offers a lean, cost-effective order management solution built rapidly using our existing SaaS framework, customized for the client's needs at a fraction of typical enterprise pricing.

Proposed Solution & Implementation Approach

We will configure our existing multi-tenant order management SaaS product for the client, adding custom fields and a basic integration connector to the client's ERP. Most functionality is delivered out-of-the-box with light customization rather than new development, which keeps costs and timeline low.

Integration with the payment gateway will use a standard connector; deeper customization of payment workflows is available as a future phase if needed.

Timeline, Team Structure & Milestones

Estimated delivery: 8 weeks. Team: 1 implementation consultant (part-time) and 1 developer. Milestone 1 (Week 2): environment provisioned. Milestone 2 (Week 5): configuration complete. Milestone 3 (Week 8): go-live.

Note: this is an aggressive timeline assuming no major ERP data-mapping surprises.

Price Table & Assumptions

Pricing assumes the client uses our standard SaaS connectors without deep customization. Custom integration work beyond the standard connector is billed separately at \$150/hour.

Item	Cost (USD)	Notes
Implementation (fixed price)	\$95,000	8-week delivery, standard connectors only
Annual support & maintenance	\$24,000/yr	Email ticketing, business hours
Total Year 1	\$119,000	Implementation + first year support

Security, Compliance & Risk Controls

Data is encrypted in transit. We follow general industry best practices for security. We are in the process of pursuing formal compliance certification but do not currently hold SOC 2 or ISO 27001 certification.

Support Model, Relevant Experience & References

Support is provided via email ticketing with a target 24-48 hour response time during business hours. This will be our first deployment specifically for a retail distributor of this size; most of our current customers are smaller retail businesses.
