

NexaWorks — RFP Response: Order Management Platform

Executive Summary

Request for Proposal: Supplier response to build and support a cloud-based order management platform for a mid-size retail distributor, including integration with existing ERP and payment systems.

NexaWorks proposes a balanced solution combining proven modular architecture with a highly structured implementation methodology, minimizing delivery risk while keeping cost and timeline reasonable.

Proposed Solution & Implementation Approach

The platform uses a modular service architecture (order, inventory, payment, notification services) deployed on managed cloud infrastructure. ERP integration uses a middleware adapter pattern that has been reused across four prior client engagements, reducing integration risk.

Payment gateway integration follows the client's existing PCI-scoped workflow, minimizing changes to the client's compliance boundary.

Timeline, Team Structure & Milestones

Estimated delivery: 14 weeks, using our structured 5-phase delivery methodology: Discovery (Weeks 1-2), Design (Weeks 3-4), Build (Weeks 5-10), Test & UAT (Weeks 11-13), Cutover (Week 14). Team: 1 delivery lead, 2 engineers, 1 QA engineer, all dedicated.

Each phase ends with a formal client sign-off gate and a documented risk log review, including staffing contingency plans if a team member is unavailable.

Price Table & Assumptions

Pricing assumes the client's ERP exposes a documented API; additional discovery time will be billed at standard rates if custom ERP work is required.

Item	Cost (USD)	Notes
Implementation (fixed price)	\$260,000	14-week delivery, structured 5-phase methodology
Annual support & maintenance	\$54,000/yr	4-hr critical SLA, business hours
Total Year 1	\$314,000	Implementation + first year support

Security, Compliance & Risk Controls

NexaWorks follows documented secure-SDLC practices and encrypts data at rest and in transit. We are currently mid-process on SOC 2 Type I certification (expected completion in 4 months) and can provide our internal security policy documentation on request.

Support Model, Relevant Experience & References

Dedicated support team with a documented escalation path and a 4-hour response SLA for critical issues during business hours, 24-hour SLA otherwise. NexaWorks has delivered four similar order-management or inventory platforms in the retail and distribution sector over the past three years; two client references are available on request.
