

Orbit Digital — RFP Response: Order Management Platform

Executive Summary

Request for Proposal: Supplier response to build and support a cloud-based order management platform for a mid-size retail distributor, including integration with existing ERP and payment systems.

With over a decade of experience delivering retail technology platforms, Orbit Digital brings deep domain expertise and a proven track record to this engagement.

Proposed Solution & Implementation Approach

Orbit Digital will build a custom order management system tailored to the client's workflows. The system will integrate with the client's ERP and payment systems using modern integration practices. Specific integration architecture will be finalized collaboratively with the client's technical team during the discovery phase.

We prefer to keep initial technical design flexible so it can evolve based on discovery findings rather than being locked in during the proposal stage.

Timeline, Team Structure & Milestones

Estimated delivery: 16 weeks (subject to refinement after discovery). Team: 1 account director, 2 engineers (allocation may flex based on concurrent projects). Milestones will be defined jointly with the client after discovery is complete.

Price Table & Assumptions

Pricing is a not-to-exceed estimate; final scope and cost will be confirmed after the discovery phase, which is included in the price below.

Item	Cost (USD)	Notes
Implementation (not-to-exceed estimate)	\$310,000	16-week estimate, scope finalized post-discovery
Annual support & maintenance	\$60,000/yr	Same-business-day response target
Total Year 1	\$370,000	Implementation + first year support (estimate)

Security, Compliance & Risk Controls

Orbit Digital has extensive experience meeting enterprise security requirements across prior retail engagements. We hold ISO 27001 certification at the company level. Specific controls for this project (encryption approach, access model, audit logging) will be documented during the design phase.

Support Model, Relevant Experience & References

Orbit Digital has delivered over 15 retail and e-commerce platforms over the past decade, including two large-scale order management systems for national retailers. Three client references are available, including a Fortune 500 retail account. Support model includes a named account manager and a shared support queue with a same-business-day response target.
